Nino Herenda

Software Engineering Student & AI/Full-Stack Developer

01 SUMMARY

Software Engineering student building AI-powered SaaS products, web applications, and automation systems. Founded and shipped a production B2B SaaS platform end-to-end — architecture, backend, database, auth, payments, and LLM integrations. Combines hands-on full-stack development with a strong background in SEO/AEO, technical content, and Web3, giving products both solid engineering and market reach.

02 EXPERIENCE

Founder & Lead Engineer — AEO Audit Pro ACTIVE

MAY 2026 – PRESENT | Remote

- Designed and built a production B2B SaaS platform (Next.js, TypeScript) for Answer Engine Optimization — auditing how LLMs (ChatGPT, Perplexity, Gemini, etc.) parse and represent corporate brands.
- Built the full backend on Supabase (PostgreSQL), including data pipelines that scrape, evaluate, and structure AI-generated search visibility metrics.
- Implemented authentication with Clerk and subscription billing with Dodo Payments, taking the product from initial codebase to a live, paying-customer-ready environment.
- Integrated the Gemini API to power automated brand audits, and owned the full product roadmap — architecture, deployment, and iteration.

SEO Outreach Specialist — Zentury Media

FEB 2026 – MAY 2026 | Sarajevo (On-Site)

- Identified and vetted high-authority websites to establish long-term marketing partnerships.
- Managed end-to-end communication and negotiations with site owners to expand the company's digital footprint.
- Scaled the link-building marketplace by onboarding new high-quality partners and optimizing outreach strategies.

Junior DevRel — RZLT

JUN 2025 – NOV 2025 | Remote

- Audited and optimized technical documentation for Web3 and AI clients, improving clarity and developer onboarding.
- Simplified complex technical concepts into clear, accessible content for developers and non-technical users alike.
- Supported community engagement and growth initiatives for client products.
